Cisco SD-WAN as a Service

Complete Communications Specializes in Cisco SD-WAN Solutions

Cisco SD-WAN (Viptela & Meraki) brings significant cost savings to your WAN. Implementing a self-managed SD-WAN can be challenging. Complete Communications can help you build the best Cisco SD-WAN as a Service solution that meets your individual network environment needs. Complete Communications will also leverage its unique offerings, helping you architect the carrier component of Cisco SD-WAN. Complete will do the heavy lifting, so that you have the proper carrier in place, still ensuring you can take full advantage of the agnostic transport capabilities that Cisco SD-WAN brings to the table.

Advantages of a Managed Cisco SD-WAN Solution

- Fully Managed Cisco SD-WAN set-up and ongoing maintenance

- Agnostic optimized carrier solution, ensuring maximum savings

- Opex models available

- Elimination of complexity & man-hours through Cisco SD-WANaaS

- Managed environment, like managed MPLS, but with more significant cost advantages

- ROI analysis provided making it easier to obtain financial buy-off internally

- Complete Communications manages implementation of carriers and Cisco SD-WANaaS for seamless transitions

Cisco SD-WAN is the Future of your Network

Let Complete Communications and Cisco SD-WANaaS show you what you can achieve!
