Complete Communications Helps Fully Manage a Cisco SD-WAN Solution for a Large Insurance Organization with Limited IT Staff

The Challenge

Large insurance organization with multiple offices and data centers to support with limited IT staff. Customer was interested in migrating from a fully managed MPLS network. Customer could not support a self-managed SD-WAN solution but still wanted to take advantage of the benefits of an SD-WAN solution

Complete Communications Solution

The Complete Communications team are experts in managed and un-managed SD-WAN solutions, identified customer requirements and were able to provide the customer a fully managed Cisco SD-WANaaS offering. Complete also built the business case through their proprietary software that allowed the customer to still show significant cost savings while leveraging the benefits of SD-WAN. Complete was able to help the customer show a significant cost savings of 25% on the WAN, add significant bandwidth, diverse paths and providers. This was all fully-managed from implementation and day two support on the hardware and the circuit and billing.

Complete Communications Specializes in Cisco SD-WAN Solutions

Cisco SD-WAN (Viptela/Meraki) brings significant cost savings to your Wide Area Network. Implementing a self-managed SD-WAN can be challenging. Complete Communications can help you build the best Cisco SD-WAN as a Service solution that meets your individual network environment needs. Complete communications will also leverage its unique offerings, helping you architect the carrier component of Cisco SD-WAN. Complete will do the heavy lifting, so that you have the proper carrier in place, still ensuring you can take full advantage of the agnostic transport capabilities that Cisco SD-WAN brings to the table.

Advantages of a Managed Cisco SD-WAN Solution:

- Fully Managed Cisco SD-WAN set-up and ongoing maintenance
- Agnostic optimized carrier solution, ensuring maximum savings
- Opex models available
- Elimination of complexity & man-hours through Cisco SD-WANaaS
- Managed environment, like managed MPLS, but with more significant cost advantages
- ROI analysis provided making it easier to obtain financial buy-off internally
- Complete Communications manages implementation of carriers, and Cisco SD-WANaaS for seamless transactions
